# “Creating Outdoor Environments for Generations to Come.”

## COMPANY BACKGROUND

Founded in 1983 by Charles J. Goetz, III, Brandon Landscape Inc. has become an established leader in residential landscape design and construction in the Pittsburgh area. We hold professional memberships with the American Society of Landscape Architects (ASLA) and the American Nursery & Landscape Association (ANLA). Our company is proud to offer services in all phases of the landscape industry. These include Landscape Design (new construction and renovation), Hardscape Construction (Paving, Decks, Retaining walls, Outdoor Lighting, & Water Gardens), and Comprehensive Lawn and Landscape Maintenance Programs.

## OUR MISSION

- Heighten the awareness of the professional landscape industry.
- Educate our customers as to the importance and value of a landscape, which had been professionally designed and installed.
- Through honesty and integrity, strive to earn the respect and confidence of our customers and peers.
- Through our landscape creations, enrich the lives of our customers and employees.

## LANDSCAPE DESIGN

Hiring a professional landscape architect can be one of the best decisions you'll ever make for your property. Architects are dedicated to solving your landscape problems, with the latest products and technology, all the while creating cost effective solutions.

More importantly, choosing a member of the American Society of Landscape Architects (ASLA) is an assurance that you are hiring a qualified professional.

The primary function of the landscape architect is to provide, you, the client with alternative landscape choices. This is usually done by a drawing or perspective (bird's eye view). However, designing your landscape is also a creative process.

A good landscape architect will not only evaluate your property, but encourage, inspire and listen to you. Be realistic about your budget. Give your architect as much information as possible and share your ideas. The better you and your landscape architect communicate the more successful the project. It's your dream.

### MAKE IT A REALITY!

At Brandon, we believe in carefully planned designs that take the season, sunlight, wind, soil, slope, and architecture into consideration.

There are some pertinent factors to consider when embarking on this process. The usability and functionality of landscape elements in relation to residence, curb appeal, sustainability and long-term maintenance and equity (resale value).

Hiring a landscape architect can add considerable value to your home and property. Professional landscaping has a recovery value of 100%-200% on the re-sale of your home.

As you choose an architect for your next landscape project, we hope you will give us the opportunity to discuss the solutions we may have for you.
